PLEASE NOTE:

- All references to the Allentown MD 5E switch are associated with CLLI code ALTWMDATDS0 and will not be repeated throughout the notice.
- All references to the Hyattsville MD CS2K switch are associated with CLLI code HYVLMDHYPS0 and will not be repeated throughout the notice.

Description of the Planned Network Change(s):

The Verizon Allentown MD 5E switch, located at 3210 Tucker Road, Allentown, MD 20744, will be retired and removed from the Verizon network after all traffic served by this switch is migrated to the Hyattsville MD CS2K switch, located at 5500 Baltimore Avenue, Hyattsville, MD 20781. All traffic to be migrated to the Hyattsville MD CS2K switch includes, but is not limited to, Inter-LATA (ACCESS/FG-B-D/CLEC IXC), wireless and paging traffic.

Description of Reasonably Foreseeable Impact(s) of the Planned Change(s):

All carriers, including competitive local exchange carriers (CLECs), Interexchange carriers (IXCs, IECs), wireless carriers, and paging carriers, will need to provision new trunk groups to support direct end office trunking to the Hyattsville MD CS2K switch or have existing trunk groups to that switch augmented.

All ASRs for the Hyattsville MD CS2K switch must be received no later than **July 5, 2023** to provide sufficient time to migrate the traffic described above. Local Exchange Routing Guide (LERG) change effective dates will be posted prior to decommissioning of the Allentown MD 5E switch (**on or after August 14, 2023**). This will serve to guide interconnect re-routes of traffic for the NPA codes currently served by the Allentown MD 5E switch to reflect the Hyattsville MD CS2K switch as the new home switch. All trunks to the Hyattsville MD CS2K switch must be in place prior to the decommissioning of the Allenton MD 5E switch. All ASRs for the Hyattsville MD CS2K switch must carry a project code of **ALTWMDATRP0**.
