Dear Access Customer:

SUBJECT: VERIZON VALIDATION ENGINE

Implementation of the Verizon Access Validation Engine for the North (former Bell Atlantic North) is scheduled for September 23, 2002, and the West (former GTE) for October 21, 2002, for ASRs within our initial scope. **This will include Special Access DS0s, DS1s, and DS3s, received via NDM, with a REQ TYP of S, E, V and X, and ACT= N.**

Switched Access and additional REQ TYPs will be added in later phases. The Edit Engine will screen for and return to the customer any errored ASR(s) *before* they are accepted into our system for processing.

The following is Verizon's Validation Engine schedule for Verizon-North and Verizon-West.

**Verizon North: (Former Bell Atlantic Service Areas Only)**

**Friday, September 20, 2002:** All inbound ASR file transmissions will be validated as they are today.

**Outbound acknowledgement files will be returned as they are today.**

**Saturday and Sunday, September 21-22, 2002:** The Validation Engine will be introduced for NDM files that are within the Engine's scope, which is found in Attachment 1.

**Monday, September 23, 2002:** All files sent and received that are in scope for the Validation Engine will be passed through the Engine for Validation.

**Outbound acknowledgement files will be returned as they are received, in the same file as those that did not fall under the Validation Engine scope.**

**Verizon West: (Former GTE Service Areas Only)**

**Friday, October 18, 2002:**            **All inbound file transmissions will be validated as they are today.**

**All outbound confirmation file transmissions will be returned as they are today.**

**Saturday and Sunday,  
October 19-20, 2002:**

**The Validation Engine will be introduced for NDM files that are within the Engine's scope, which is found in Attachment 1.**

**Monday, October 21, 2002:**

**All files sent and received that are in scope for the Validation Engine will be passed through the Engine for Validation.**

**Outbound acknowledgement files will be returned as they are received, in the same file as those that did not fall under the Validation Engine scope.**

All Business Rules must be followed so that ASRs will not error. The Business Rules Database can be found at:

[http://www22.verizon.com/wholesale/business\\_rules/access/](http://www22.verizon.com/wholesale/business_rules/access/)

Please forward this information to those people within your organization responsible for implementing any changes necessary for compliance with Verizon Validation Engine requirements. If you have any questions, please call your Verizon Account Representative.

**ACCESS VALIDATION ENGINE SCOPE**
