Subject: InterCom Changes for ASR 23

InterCom Users:

In keeping with the industry upgrades, we will be installing Access Service Ordering Guidelines (ASOG) ASR 23 on Saturday, June 9, 2001.

The system will be brought down at 12:00am (est) to prepare for the installation. The system will not be available to users until 7:00am (est) Monday, June 11, 2001.

See attached for changes to the InterCom screens.

The User Guide will be available on line June 11. You can access the User Guide via the Library link from the Access Customer Gateway homepage.

If you have any questions please contact me at 813 483-2550.

Thank you,

Michelle Kernodle

attach.

Access Service Request Form Screen (ASR screen)

New Fields	Description	Use
LADATED	<u>Date of Lease Arrangement</u> Identifies the date appearing on the lease arrangement.	Required when the LANM field is populated, otherwise prohibited.
LANM	<u>Lease Authorization Name</u> Indicates the name of the transport owner (lessor) representative who signed the lease arrangement.	Optional when the LA field = "Y", otherwise prohibited.

Service Address Location Information Screen (SALI screen)

New Field	Description	Use
ICOL	<u>ICO Location</u> Identifies the serving wire center of the Independent Company (ICO) for the end user location.	Optional when the ASC-EC field on the ASR Form and the SASN field are populated, otherwise prohibited.

Network Assignment Information Screen (NAI screen) (Verizon does not use this form at this time)

New Field	Description	Use
FNIA	<u>Fiber Network Identification A</u> Identifies all services associated with a particular fiber based network with a Drop Port Equipment Assignment at location A (DPEAA).	Optional when the DPEAA field is populated, otherwise prohibited.
FNIZ	<u>Fiber Network Identification Z</u> Identifies all services associated with a particular fiber based network with a Drop Port Equipment Assignment at location Z (DPEAZ).	Optional when the DPEAZ field is populated, otherwise prohibited.

Changed / Deleted Fields

Field	Screen	Change / Delete
IMPTEL	Trunking Form	<u>Name Change to FIMPTEL</u> <u>Facility Implementation Telephone Number (T1)</u> Identifies the telephone number of the implementation contact for the T1 facility.
DIDR	Confirmation Notice (CN)	Deleted field

Application Enhancements

Screen	Today	Future
Report	To Retrieve ASR you must, Click "select ASR" then click "View ASR"	To retrieve ASR, click radio button containing CCNA/PON/VER/ICSC
Multi-EC	System auto populates ASC_EC and OEC information based on information found in the ASC_EC and OTC fields. (This auto population caused many errors on the MEC screen for which we had to create work arounds to clear)	System will continue to populate ASC_EC information and will populate the OEC information if the ICSC and the ASC_EC are different. User will have to manually populate any other OEC information.
REJECT feedback status	System currently shows only the last error message.	System will show all error messages.
