March 26, 2002

On March 7, 2002, Verizon - West (the former GTE telephone companies¹) filed errata (Transmittal No. 158) to its Annual Interstate Access Tariff Filing, for the Verizon Tariffs FCC No. 14 and No. 16. This errata filing incorporates the correcting of errors in certain demand data in the annual filing that was incorrect, including demand used to calculate certain exogenous adjustments associated with exchanges that were sold during the base period (2000) prior to the filing. Specifically, this filing corrects three items: (1) carrier common line (CCL) minutes of use for the GSTC California jurisdiction (CCCA); (2) Directory Assistance (DA) demand in the GTOC Wisconsin jurisdiction (GTWI); and (3) errors in revenue calculations involved in the Sale of Exchanges exogenous costs in three jurisdictions (COMT, GTMO and GTWI).

In this filing, Verizon-West is implementing changes to rates in the three Price Cap baskets. Overall, Verizon-West increases index revenues by \$5.5 million. At the basket level, the Common Line revenues increase by \$4.3 million. Traffic Sensitive Basket revenues increase by \$0.1 million. Special Access basket revenues increase in aggregate by \$1.1 million. The rates became effective on March 22, 2002.

The following chart illustrates the proposed percent change in revenues associated with major service categories within their respective baskets. Specific, detailed rate element changes are contained in the filing support material.
