Dear Customer:

Subject: UPDATE TO TEMECULA CALIFORNIA CENTRAL OFFICE  
CONVERSION

To meet the growing demand for telephone service, GTE is installing new switching equipment in Temecula on September 30, 2000. Because of this service upgrade, customers will be receiving a new seven-digit phone number(s) starting with the 296 or 719 prefix. Please be aware, requests for new service or current change of service to an impacted service section on the Rancho switch could constitute a number change before September 30th.

In addition, the area code changed to 951 on February 12, 2000 when the 909 Area Code split into 909 and 951 to meet the demand for new telephone numbers. A seven-month permissive dialing period is currently in effect.

Please see your account manager for procedures for this conversion.

Sincerely,

A handwritten signature in black ink that reads "Beth Mullens". The signature is written in a cursive, flowing style.

Beth Mullens
