Dear Customer:

Subject: E-911 requirements for 903/430 – Overlay Relief Plan

On February 4, 2002, the Public Utility Commission of Texas ordered NPA overlay relief for Northeastern Texas. The North American Numbering Plan Administration (NANPA) has assigned the 430 NPA to overlay the existing 903 NPA(s). With an overlay, the new NPA(s) will serve the same geographic areas as the existing NPA(s).

If you are not presently utilizing SS7 trunking in the 903/430 area to provision E 9-1-1, it will be necessary to either convert to SS7 or to establish additional MF CAMA trunks to distinguish between 903 and 430 NPAs. It is necessary to have distinct trunk groups, one for each area code, in end offices using multiple NPAs and CAMA trunking for 9-1-1 call delivery to the Verizon tandems.

Verizon is currently accepting Access Service Requests (ASR) with trunk testing dates available between July 20, 2002 and January 15, 2003. Submit requests no later than October 11, 2002 so that there is sufficient time for provisioning and testing by the February 15, 2003 NPA in service date. If additional DS1s are required, ASRs should be submitted no later than October 11, 2002.

Please contact your account representative at Verizon if you have any questions.
