## **Amended Notice of Network Change under FCC Rule 51.329(b)**

### **Installing Digital Subscriber Line Access Multiplexer Systems In West Newton, Pennsylvania**

**August 22, 2007**

In compliance with Section 51.329(b) of the Commission's rules, Verizon hereby amends the Standard Network Change Notification ("Notification"), dated March 22, 2007, regarding the installation of Digital Subscriber Line Access Multiplexer ("DSLAM") facilities in Verizon's West Newton, Pennsylvania remote terminal (WNTPAALJ01). The Notification was released for Public Notice by the Commission on June 13, 2007 in Report No. NCD-1419.

The Notification indicated that the implementation date of the planned network change is scheduled to occur on or after December 31, 2008. Instead, Verizon will now install DSLAM facilities in the affected remote terminal on September 30, 2007. As a result of the date change, Verizon will serve this letter to applicable parties pursuant to Section 51.333(a). All other information contained in the Notification remains unchanged and is provided below.

---

**Carrier:** Verizon Pennsylvania Inc., 1717 Arch Street, Philadelphia, PA 19103

**Contact:** For additional information on these planned network changes, please contact:  
Margaret H. Detch  
Manager – Wholesale Regulatory Advocacy  
Verizon Partner Solutions  
385 Myles Standish Blvd., Rm C-040  
Taunton, MA 02780  
508-884-1445

#### **Planned Network Changes Will Occur at the Following Locations:**

<b>Location</b>	<b>Verizon Central Office</b>	<b>Verizon Remote Terminal</b>	<b>Implementation Date (on or after)</b>
West Newton, PA	WNTNPAWN	WNTPAALJ01	September 30, 2007

**Description of the Planned Network Changes:** Verizon will install DSLAM facilities in the above-referenced West Newton Remote Terminal.

**Description of Reasonably Foreseeable Impact of the Planned Changes:** After the planned network changes are implemented, xDSL-compatible copper (metallic) loops leased by a wholesale carrier customer from Verizon and attached to a wholesale carrier customer's DSLAM collocated within Verizon's West Newton Central Office could encounter spectral interference as a result of the aforementioned network change.
