RE: Ethernet Discounts Extended and Expanded!

Verizon Partner Solutions (VPS) is pleased to announce an extension and expansion of the "TLS Yes!" promotion. Originally scheduled to end on December 31, 2007, the promotional period for this offer is being extended to December 31, 2008.

Concurrent with the extension, Verizon is also expanding the TLS Yes! promotion. Under the original TLS Yes! promotion, only new User Network Interface (UNI) port and access lines ordered under a 3- or 5-year commitment period were eligible to receive promotional pricing. Starting January 1, 2008, the promotion will be expanded to include new UNI port and access lines ordered under a month-to-month plan*.

Under the TLS YES! promotional offering, customers receive 30% discounts on UNI port and access line charges and waiving of interoffice mileage charges on one of our best Ethernet solutions – Transparent LAN Service (TLS). TLS YES! discounts are available in the Northeast to more than 1,000 select buildings. Building locations include cities such as Boston, Newark, New York, Philadelphia, Pittsburgh, Washington DC, and other major cities in CT, DC, DE, MA, MD, ME, NH, NJ, NY, PA, RI, and VA. The promotional discounts are offered on two services available under TLS: our E-LAN service known as Ethernet Multipoint Service; and our E-Line service known as Ethernet Relay Service.

Don't wait any longer to take advantage of this great opportunity to save on this high-value, industry-leading service from Verizon! Helping you succeed is important and this promotion is yet another way we show you just how much we stand behind that belief.
