Marlene H. Dortch  
Secretary  
Federal Communications Commission  
445 12<sup>th</sup> Street, SW  
Washington, DC 20554

**Re: Report Nos. NCD-1397 and NCD-1399**

Dear Ms. Dortch:

In compliance with Section 51.329(b) of the Commission's rules, Verizon hereby amends certain Short Term Network Change Notifications ("Notifications") released by the Commission on April 6, 2007 for Public Notice in Report Nos. NCD-1397 and NCD-1399. The Notifications, related to network changes in Rhode Island and Pennsylvania, inadvertently overstated the modifications to Verizon's network by indicating that Verizon currently intends to retire copper feeder facilities in the affected locations and replace those facilities with new fiber optic cable and digital loop carrier systems.

Instead, Verizon will install Digital Subscriber Line Access Multiplexer ("DSLAM") facilities in the affected remote terminals. After implementation, xDSL-compatible copper (metallic) loops leased by a wholesale carrier customer from Verizon and attached to a wholesale carrier customer's DSLAM collocated within the applicable Verizon Central Office potentially could encounter spectral interference as a result of the aforementioned network changes. Verizon has no current plans, however, to remove or retire the copper facilities at these feeder locations. The affected central offices and remote terminals in Rhode Island and Pennsylvania are listed in the Attachment accompanying this letter.

Verizon will serve this letter to the same parties that received service of the original Notifications pursuant to Section 51.333(a). Please contact me should you need any further information.

Sincerely,

A handwritten signature in black ink, appearing to read "Ann D. Berkowitz".
