

New!

Site Ready Service

Fact Sheet

Simply, Securely, Reliably. Better matters.

Better experience.

The date is set for your customer's new Verizon Ethernet service installation, but your customer's site isn't ready. What do you do to prevent delays? **You're stuck unless... you are a VPS Site Ready customer.**

VPS Site Ready Service

Verizon Site Ready Service helps you and your end user avoid unnecessary installation delays. We are the single source to get needed preparation work done at an end user's site for the delivery of the network connection. We coordinate the work, so your end user doesn't have to shop for and manage multiple contractors to prepare the site. We offer simple, straightforward pricing and ordering. And, we use only trained and licensed technicians, so you know the work will be done right the first time.

Site Ready Service provide the necessary preparation work at an end user's location in order to install fiber based Carrier-grade Ethernet service.

Better offerings.

Overview of Service

The Site Ready process automatically begins after a Verizon switched Ethernet Access order has been processed. Following the processing of a Verizon Ethernet Access order, a Verizon Field Engineer is dispatched to the end user's site to perform a Site Survey and assess its readiness to support Verizon Switched Ethernet Access deployment. If the end user's site is not ready, Verizon's Field Engineer will identify the appropriate Site Ready solution and send a quote to you for Site Ready Service at that end user site.

What is included?

Preparation work in the end user site where Verizon's Ethernet service will be installed.

- Backboard and shelf
- Inner duct, pull string and core drilling as needed
- Materials to extend the circuit

Not all packages include AC power (additional charge).

Better relationships.

Our Site Ready Service takes care of your site preparations from beginning to end. You can rely on Verizon to smooth the path to your Switched Ethernet service installation. We'll keep it on track so you can stay focused on your new Verizon service as soon as possible.

Learn more.

To learn how Verizon Site Ready Service can simplify the effort required to prepare your end user's site for a new network service installation, contact your Verizon Account Manager.
