

## Verizon Provider Notification Report Reference Guide

The Provider Notification Report is an electronic file advising the existing local service provider that the end user customer has migrated to a new local service provider. CLECs/Resellers can retrieve their reports via the Customer Wholesale Portal (CWP) Reports, EDI or Connect:Direct.

The CLECs contact the Wholesale Customer Care Center (WCCC) for line loss exceptions. The exceptions process is documented on the Verizon website at [www.verizon.com/wholesale](http://www.verizon.com/wholesale)

### Verizon Provider Notification Report – Sample CLEC format CWP Reports

The Verizon Connectivity Management Team assigns user IDs and passwords and can be contacted at [connectivity.management.team@verizon.com](mailto:connectivity.management.team@verizon.com)

Each daily file is placed within the unique directory for each CLEC/Reseller as a separate file ".llrprod".
