## 1.1 Change Log

The following table documents all major changes to the Test Deck since the October 2015 publication, Version 29.1:

Change Number	Scenario Number	Description of Change	Changed from Version
1	ALL	Update all cases with CTE In/Out	30.0
2	ALL	Update all cases with Production In/Out	30.1

## 1.2 Overview

The purpose of the Verizon East- MDV Quality Baseline Validation Test Deck is to provide CLECs/Resellers with typical wholesale Pre-Ordering and Ordering scenarios and the corresponding messages and LSRs. This test bed contains only a subset of the possible scenarios for a CLEC/Reseller. These scenarios are not comprehensive and it is not recommended that these be the only scenarios tested by the CLEC/Reseller. They should be used as a starting point.

The Verizon East - MDV Quality Baseline Validation Test Deck is a regional test deck serving Maryland, Virginia, and the District of Columbia. As such, individual test cases yield Input and Output messages which would be valid throughout the four regions this test deck serves. For example, since MDV operates in the same fashion throughout the four regions, a given Pre-Order or Order Transaction would have the same Input and Output messages in any of the four regions, with the exception of certain obviously variable data like TNs and Addresses.

CLECs who intend to test MDV will need to contact their testing coordinator in order to test this functionality. **The account information used for MDV test scenarios in this document is for Verizon internal use only.** Those CLECS wishing to test MDV using similar accounts should contact their testing coordinator so that separate accounts can be established.

For Pre-Ordering and Ordering scenarios, the LSOG9 standard is used.

For Ordering, there are scenarios included for MDV in Section 3.2 using the LSOG9 standard. Included are MDV Resale, Platform, and UNE scenarios.

For Pre-Ordering scenarios, a sample inbound request and the corresponding outbound response have been provided. For Ordering scenarios, the LSR, the inbound EDI request, and the outbound EDI response (Local Response) are provided.
