

A separate network is a **SECURE NETWORK.**

Give your customers the safety and security of a reliable private IP network with a name they can trust. Verizon Global Wholesale's Private IP Service is designed as a separate network for your customers and their important information. We offer a dedicated private IP network throughout the U.S. and in over 130 countries which provides the privacy and protection your customers need, with available features to enhance their performance. Your customers can streamline and prioritize their voice, video, and data in one unified network for broader reach and bottom-line savings.
