

Founded in 1980 by a team of forward-thinking automation experts at NASA, SMA Solutions is committed to creating transformative software tools that allow IT departments to significantly increase productivity, efficiency and accuracy across the enterprise. With its headquarters in Houston, Texas, the company also has offices in the UK, the Netherlands, France, Switzerland, Italy and New Zealand. SMA currently serves diverse clients in North America, Latin America, South America, Europe, Africa and the Asia/Pacific region.

## Our Flagship Product

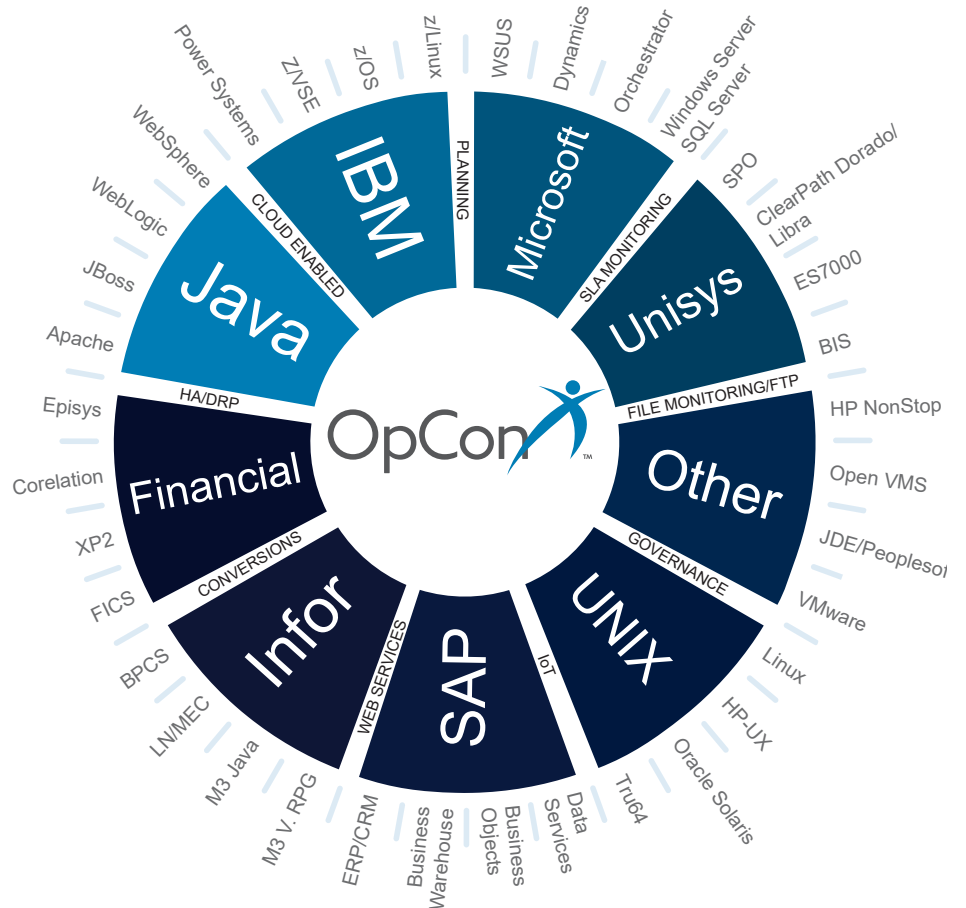

SMA's OpCon is based on a simple premise: If an IT task is repetitive, it should be performed by software, not a human operator. This approach frees valuable resources, enhances efficiency and eliminates the chance of human error. This last point is especially critical for highly regulated industries, such as banking and insurance.

OpCon is the only IT automation solution available today that can automate and integrate processes on every major operating system. By unifying processes across multiple platforms, OpCon provides a singular view that spans the entire enterprise. As a result, many customers are able to replace several existing products with OpCon.

### Industries

SMA Solutions' products are designed to enable IT departments operating in any industry to achieve dramatic results that span the entire enterprise. The company currently serves clients in the following vertical markets:

- ▶ Agriculture
