1.2 Overview

The purpose of the Verizon – Quality Baseline Validation Test Deck is to provide CLECs/Resellers with typical wholesale Pre-Ordering and Ordering scenarios and the corresponding messages and LSRs. This test bed contains only a subset of the possible scenarios for a CLEC/Reseller. These scenarios are not comprehensive and it is not recommended that these be the only scenarios tested by the CLEC/Reseller. They should be used as a starting point.

CLECs who intend to use an address in St. Petersburg, Florida area need to contact their Testing Coordinator for the correct address format, or refer to the examples in this document for formatting.

For Pre-Ordering scenarios, a sample inbound EDI request and the corresponding outbound EDI response have been provided. For Ordering scenarios, the LSR, the inbound EDI request, and the outbound EDI response are provided.
